This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. EXPLANATION OF TABLES AND CLASSIFICATION OF COUNTRIES IN SECTION I.

GENERAL IMPORTS AND EXPORTS ENTERED FOR CONSUMPTION.

The *statements of general imports*, Tables Nos. 3, 4, 4*a*, and 5, embrace imported articles entered at the custom-houses for immediate consumption and imported articles entered for warehouse. The statements of *imports entered for consumption*, Tables Nos. 24, 25, and 26, embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. The statement of *general imports* and the statement of *imports entered for consumption* for any period will always differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Portions of these goods may be subsequently exported.

OFFICIAL VALUES.

1. *Value of imports:* The values of imported articles in this report are those which they bore in the markets of the foreign countries from which they were imported. The act of March 3, 1883, excluded from the dutiable value the following costs and charges, which prior to that act had formed a part of the dutiable value of imports, viz:

"The cost of transportation, shipment, and transshipment, with all the expenses included, from the place of growth, production, or manufacture, whether by land or water, to the vessel in which shipment is made to the United States; the value of the usual and necessary sacks, crates, boxes, or covering of any kind in which such merchandise is contained; commission at the usual rates, but in no case less than 2½ per centum, and brokerage, export duty, and all other actual or usual charges for putting up, preparing, and packing for transportation or shipment."

Under this system of valuation the value of imported commodities landed on our wharves is less than their actual cost or value to the importer by the amount of the above costs and charges and the cost of freight on the goods from the last foreign port whence they were shipped to the United States. The item of freight from the last foreign port of shipment to the United States, however, has never been included in the dutiable value. The difference in methods of valuation of imports should be considered in any comparison made between the official values of imports of merchandise for years prior to July 1, 1883, and for years subsequent to that date.

The values shown in the statements both of *general imports* and of *imports entered for consumption* are mainly values of the commodities prior to appraisement; that is, the values as shown by the invoices prior to liquidation of entries.

2. *Foreign export values:* Tables Nos. 13 to 17, sometimes called "foreign exports," or "reëxports," exhibit exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is the value which they bore in the foreign markets whence they were imported into the United States; in other words, their import value (see *value of imports* above). The value of such commodities exported "not from warehouse" (that is, goods not under bond), comprising free goods mainly, is the value at the ports of the United States whence they are exported.

3. *Domestic exports:* Tables Nos. 8 to 12, inclusive, exhibit the exports of articles of domestic product or manufacture, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles and utensils made from imported metals, etc. The value of exports of domestic merchandise is their market value at the time of exportation in the ports of the United States whence they are exported to foreign countries.

4. *Value of foreign merchandise in transit or transshipped:* Tables Nos. 18 and 19 exhibit foreign merchandise brought to the United States for immediate transit across the territory of the United States to a foreign country, or for transshipment in the ports of the United States to a foreign country. The value of commodities as shown in these tables is their value in the foreign markets whence they were brought to the United States, their official value being similar to that of imports.

5. *Value of warehoused merchandise:* Tables Nos. 21, 22, and 23 exhibit warehoused imported merchandise. This merchandise has already appeared in the statements of *general imports*, Tables Nos. 3, 4, 4*a*, and 5, for the year during which it was imported. The official values of the articles therein represented are the same as the *import values* above described.

DEFECTS IN EXPORTS.

6. The statistics of exports of domestic commodities to Mexico and to Canada by land are defective, owing to the fact that there is no law requiring railway companies to furnish to collectors of customs statistics of domestic merchandise transported over their roads to these foreign countries.

CLASSIFICATION OF ARTICLES IMPORTED AND EXPORTED.

7. Tables Nos. 5 and 15 exhibit the condensed classification of articles for the statements of *general imports* and *exports* of *foreign articles;* and Table No. 24 exhibits the extended classification of articles according to which the statements of *imports entered for consumption* are compiled and published, the former classification being the condensation of the latter. Statements of *general imports and exports of foreign articles* by *countries* and by *customs districts* are compiled only according to the former classification, the latter being too much extended and in detail to admit of the compilation of imported articles by countries and by customs districts within the time when such statistics would be valuable in the current business of the country. Table No. 10 exhibits the classification of *domestic articles exported.*

8. The word *ton*, wherever used in tables of imports, indicates the long ton of 2,240 pounds, and the hundred-weight represents 112 pounds.

REPORT

OF

THE CHIEF OF THE BUREAU OF STATISTICS

IN REGARD TO

THE FOREIGN COMMERCE OF THE UNITED STATES.

TREASURY DEPARTMENT,
BUREAU OF STATISTICS,
November 18, 1890.

SIR: I have the honor to submit to you the following report in regard to the foreign commerce of the United States for the year ending June 30, 1890.

GENERAL VIEW OF OUR FOREIGN COMMERCE.

The value of our foreign commerce, including imports, exports, and in-transit trade of merchandise during the last fiscal year was $1,758,537,945, as against $1,582,339,533 in 1889, an increase of $176,198,412.

The value of our imports of merchandise amounted to $789,310,409, and of exports to $857,828,684, an excess of exports over imports of $68,518,275.

Of our exports, the value of domestic merchandise was $845,293,828, and the value of foreign merchandise, $12,534,856.

Comparing the values of our foreign commerce of the last fiscal year with those of 1889, among other changes we observe the following as the most marked: The total value of imports and exports of merchandise was $1,647,139,093, as against $1,487,533,027 during the fiscal year 1889, an increase of $159,606,066.

The value of imports of merchandise amounted to $789,310,409, against $745,131,652 during the fiscal year 1889, an increase of $44,178,757.

The exports of merchandise amounted to $857,828,684, as against $742,401,375 during the fiscal year 1889, an increase of $115,427,309.

The value of our in-transit trade during the last fiscal year was $55,699,426 inwards, and the same amount outwards, as against $47,342,209 during the preceding fiscal year; an increase of $8,357,217.

The value of exports of merchandise during the last fiscal year was larger than during any year since 1881; the value of imports of merchandise was the largest in the history of our commerce.

During each of the years from 1876 to 1887, inclusive, there was an excess of exports over imports of merchandise, the yearly average for that period being $134,388,312, and amounting, in 1881, to $259,712,718. During the fiscal year 1888 the value of imports of merchandise exceeded that of exports $28,002,607; during the fiscal year 1889 only $2,730,277; but during the last fiscal year the excess of exports over imports was $68,518,275.

The value of our imports and exports of merchandise reached its highest point before in 1883, when it amounted to $1,547,020,316; it declined to $1,314,900,000 in 1886, increased to $1,487,533,027 in 1889, and amounted the last year to $1,647,139,093, or $100,118,777 more than during the year 1883.

The following table shows the imports and exports for each year from 1881 to 1890, inclusive, and the increase or decrease in the imports, exports, and the total values thereof, respectively:

a Excess of imports.

The value of our imports and exports has been to some extent modified by the decline in prices at home and abroad, as will appear from an examination of the tables of import and export prices of commodities in succeeding pages of this report. Notwithstanding this decline in prices that has existed more or less for several years, it will be seen that the volume of our imports and exports was during the last fiscal year $102,097,119 in excess of that of 1881, a large and gratifying increase.

GOLD AND SILVER.

Our exports and imports of gold and silver during the last fiscal year were as follows: Exports, $52,148,420; imports, $33,976,326; an excess of exports over imports of $18,172,094. The excess of exports over imports of specie during the fiscal year 1889 was $67,678,460, and the excess of imports over exports during the fiscal year 1888, $12,923,803, and during the fiscal year 1887, $24,173,101. The exports of gold during the last fiscal year amounted to $17,274,491, and imports of gold to $12,943,342; an excess of exports over imports of $4,331,149.

The values of our exports and imports of the various forms of gold and silver during the last fiscal year were as follows:

In the succeeding pages of this analysis of our foreign commerce will be found tables showing in what articles there has been an increase or decrease of imports and exports, in our trade with the various foreign countries, indicating those with which our trade has increased or decreased during the last and recent years.

PRICES OF LEADING DOMESTIC COMMODITIES IN THE HOME MARKET.

The annual average export prices in currency of our staple domestic commodities is shown since 1855 in the following table. The value of the articles named exported in 1890, embraced about 67 per cent. of the total value of our exports of domestic merchandise during that year.

There was, during the last fiscal year, an advance in the export prices of corn and cotton and a falling off in the prices of wheat and wheat flour, bacon, hams, lard, pork, butter, and cheese from the prices of similar articles during the previous year.

IMPORT PRICES OF LEADING COMMODITIES.

The following table exhibits the annual average prices of some of the leading articles of merchandise imported into the United States for each year from 1878 to 1890, inclusive. There has been an advance in the import prices of certain of these articles, among others tobacco, clothing, wool, pig iron, and hemp. The prices of the imported articles shown in this table are their values in the foreign markets whence they were imported:

The values of the imports and exports of the above-named countries are ascertained in the following manner:

In the United Kingdom the values of the imports and exports are their values as declared by the importer and exporter in the home ports.

In France, Germany, and Spain the values are the official values fixed periodically by a government commission, and represent substantially the home market values in the respective countries.

In the United States the values of exports of domestic merchandise are their values as declared by the exporters at the time of their exportation. The values of imports are those which the articles bore in the markets of the foreign countries from which they were imported. The act of March 3, 1883, excluded from the dutiable value the cost and charges which prior to that act had formed a part of the dutiable value of imports; such as (among other items) the cost of transportation, etc., from the place of product or manufacture in the foreign country to the vessel in which shipped to the United States, the values of the necessary coverings in which the merchandise is contained, brokerage, export duty, cost of packing, etc., for transportation or shipment, etc. Freight and import duties are also excluded. The returns United States import values, if computed in the same manner as those of the other countries named, would be considerably larger than they now are.

In the following table a comparison is made of the foreign commerce of the United States with the United Kingdom, from 1850 to 1889, inclusive, which shows the growth in value, and per cent. of increase of the same:

From this table it appears that the value of our imports of merchandise increased from 353.6 millions of dollars in 1860 to 789.31 millions in 1890, an increase of 123.2 per cent. Our imports from Europe increased from 216.6 millions in 1860 to 449.99 millions in 1890, an increase of 107.7 per cent. Our imports from North America increased from 67.9 millions to 148.37 millions, an increase of 118.4 per cent.; from South America, from 34.9 millions to 90.0 millions, an increase of 158 per cent.; from Asia and Oceanica, from 29.6 millions to 95.86 millions, an increase of 224 per cent.

Of the countries of Europe, our import trade with Germany shows a very marked increase, having risen from 18.5 millions of dollars in 1860 to 98.84 millions in 1890, an increase of 434 per cent.

It will also be seen that, considering the relative per cent. of imports from the various divisions and countries of the globe during the two periods above named, while 61 per cent. of our imports came from Europe in 1860, only 57 per cent. was imported therefrom in 1890; also that our imports from South America, including the West Indies, sustain about the same ratio to the imports from other countries that they did in 1860.

Our exports of domestic merchandise during the period from 1860 to 1890 increased from 316.2 millions to 845.29 millions, an increase of 167 per cent.; to Europe, from 241.2 millions to 677.3 millions, an increase of 181 per cent.; to South America, from 14.3 to 37.7, an increase of 164 per cent.; and to Asia and Oceanica from 12.4 to 35.9, an increase of 192 per cent.

When we consider the ratio or per cent. of our exports to the various grand divisions and countries during the two periods above named, we find that Europe took 80.12 per cent. of our exports in the latter period, as against 76.28 in the former. The other grand divisions appear to sustain about the same relative position in our export trade which they did in 1860.

Attention is called to the marked increase in our export trade to the United Kingdom and Germany, our exports to the former having increased from 166 millions in 1860 to 444 millions in 1890, that kingdom having taken 52.5 per cent. of our exports in 1860 and 52.58 per cent. of our exports in 1890, or over half of the exports of domestic merchandise from the United States to all countries. The value of exports to Germany increased from 12.68 millions in 1860 to 84.3 millions in 1890.

The year of our largest value of imports from, and of domestic exports to, the principal countries is shown in the following table:

EXPORTS OF COTTON.

The total quantity of unmanufactured cotton exported during the last fiscal year was 2,471,799,853 pounds, valued at $250,968,792, an increase of 86,983,614 pounds in the quantity and of $13,193,522 in the value, as compared with such exports during the preceding year.

EXPORTS OF BREADSTUFFS, AND FOREIGN COMPETITION.

The year of our largest exports of breadstuffs of domestic product was 1880, when they amounted in value to $288,036,835. Our exports of breadstuffs during the fiscal year 1889 were smaller than during any year since 1880 and amounted to $123,876,661, but rose during the last fiscal year to $154,925,927.

The following table shows the competition we are meeting in the wheat markets of the world with the products of Russia, India, Australia, and the Argentine Republic, and our relative position to those countries n the export trade in wheat during recent years.

In 1880 the countries named, together with the United States, exported 208,987,072 bushels, the share of which exported by the United States was 69.13 per cent.; but the share of the United States in the exports of wheat in 1888 was only about 20 per cent.

The shipments of wheat exhibited by the following table are exported almost entirely to supply the European markets, and it will be observed how uniform was the annual demand during the period covered by the table.

The values shown must not be taken as an accurate standard of comparison, owing to the diversity of and fluctuations in the value of the currencies of the various countries.

A comparison of the exports of the wheat product of the foreign countries named with that of the United States would be unfair to the latter without an exhibit of its exports of wheat flour, which are very large. It appears that there is very little wheat flour exported from Russia, British India, the Argentine Republic, and Australasia. The exports of wheat flour, of domestic manufacture, from the United States have been as follows:

The two following tables, exhibit the imports of wheat and flour into the United Kingdom since 1840, and the countries whence imported; also the relative position which each country has occupied as a source of supply to the British market during each year of that period.

These tables show how important a factor in the wheat industry is the demand of the British market, and that the requirements beyond

the home supply of that country are rapidly increasing, having about doubled since 1870.

The following table, exhibiting the share of each country in the export trade of wheat and flour to the United Kingdom, shows that the United States increased its exports from 35 per cent. of the whole trade in 1871 to 65 per cent. in 1880, but that its share fell to 47 per cent. in 1885, rallying during the year 1887 to 61 per cent., but fell during 1888 to 38.45 per cent., the lowest point since 1872.

SHARE OF THE PRINCIPAL FOREIGN COUNTRIES AND BRITISH DEPENDENCIES IN THE QUANTITY OF WHEAT AND WHEAT FLOUR IMPORTED INTO THE UNITED KINGDOM DURING EACH YEAR ENDING DECEMBER 31, FROM 1871 TO 1889, INCLUSIVE.

It will be observed that there was a large increase in the value of exports of provisions during the last fiscal year, such exports being larger than during any prior year excepting 1881 and 1878.

While our exports of provisions, comprising meat and dairy products, also our exports of cattle, have materially declined during recent years, there has been an encouraging increase in such exports during the last two fiscal years.

The value of provisions, including meat and dairy products, gradually fell off from $156,809,840 in 1881 to $90,625,216 in 1886, but rose to $104,122,444 during the fiscal year 1889 and to $136,264,506 during the last fiscal year, an increase of $43,205,801 over the value of such ex-

ports in 1888 and $32,142,062 over 1889. The value of our exports of beef products was the largest yet reached during the last fiscal year, and amounted to $30,151,026, an increase of $7,290,785 over like exports of 1889.

GENERAL FEATURES OF OUR IMPORTS OF MERCHANDISE DURING THE FISCAL YEAR 1890.

During the last fiscal year the value of our imports of merchandise amounted to $789,310,409, of which the value of free goods was $265,668,629 and the value of dutiable goods $523,641,780.

The total value of imports was $44,178,757 in excess of that of 1889, the increase in the value of free goods being $9,181,550 and of dutiable goods $34,997,206.

The values of the imports of 1890 grouped according to degree of manufacture, use, etc., will be found in appendix No. 8.

During the last fiscal year the largest increase in the value of our imports was in our trade with the following countries:

Countries from which imported.	Increase of imports.
	Dollars.
Germany	17,095,137
Great Britain and Ireland	8,219,889
France	8,105,693
Netherlands	6,078,390
Japan	4,415,332

There was the most marked falling off in the value of our imports from the following countries:

Countries from which imported.	Decrease in value of imports.
	Dollars.
British North America	3,612,498
British Australasia	1,720,535
Uruguay	1,232,061
British West Indies	1,120,544
Brazil	1,085,048

The imported articles which exhibited the largest increase in value over the imports of like articles during the preceding year, stated in the order of magnitude, are:

Free of duty—Unmanufactured silk, coffee, India rubber, crude; fruits, and silver-bearing ore.

Dutiable—Beet sugar, leaf tobacco, manufactures of wool, dress goods of silk, manufactures of flax, hemp, and jute; vegetables, wood and manufactures of wood.

The leading articles of imports which show a decrease in value from the imports of similar articles during the fiscal year 1889 are:

Free of duty—Hides and skins, indigo, and crude paper stock.

Dutiable—Sugar, other than beet sugar; raw wools, barley, flaxseed

or linseed, rice, iron and steel and manufactures of, and unmanufactured flax, hemp, and jute.

LEADING ARTICLES OF IMPORTS.

The following table shows the values of merchandise imported into the United States during the years ending June 30, 1882 and 1890, respectively, with the percentage of the aggregate value for 1890 of the imports of each class of merchandise. Comparison is made with the year 1882 for the reason that it was the prior year of largest imports, except 1889:

a *Imports for consumption* embrace imported articles entered for immediate consumption and imported articles withdrawn from warehouse for consumption. *General imports* embrace imported articles entered at the custom-house for immediate consumption and imported articles entered for warehouse. The general *imports* and the *imports entered for consumption* for any period will always differ to the extent that the value of entries *for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "entry for consumption" is the technical name of the entry of imports made at the custom-house, and does not imply that the goods are actually consumed, but simply that they have been delivered into the custody of the importer, and that the duties have been paid on the dutiable portion. Portions of these goods may be subsequently exported.

b Principally duty equivalent to internal-revenue tax, payable on domestic merchandise subject to such tax if consumed in the country, is exported and returned from abroad.

There was an increase in the value of imports entered for consumption, and duties collected thereon, during the last fiscal year over like imports and duties collected during the preceding year of $9,528,148 in the value of merchandise free of duty, of $22,714,996 in the value of dutiable merchandise, and of $5,963,048 in the amount of duty collected.

IN-TRANSIT AND TRANSSHIPMENT TRADE—1868 TO 1888.

Commodities which are brought into the United States for immediate transit across our territory, or for immediate transshipment in our ports to foreign countries, are not considered or treated in the statistical accounts as imports. The transportation of these commodities, however, forms a very important and valuable branch of our carrying trade. Prior to 1868 the receipts of these commodities were in the statistical accounts included in the imports, and the shipments thereof were embraced in the exports.

The following table shows the values of merchandise received from foreign countries for immediate transit across United States territory or for immediate transshipment in ports of the United States to other foreign countries:

TOTAL VALUES OF MERCHANDISE RECEIVED FROM THE PRINCIPAL AND OTHER FOREIGN COUNTRIES FOR IMMEDIATE TRANSIT ACROSS UNITED STATES TERRITORY OR FOR IMMEDIATE TRANSSHIPMENT IN PORTS OF THE UNITED STATES TO OTHER FOREIGN COUNTRIES, AND SO SHIPPED, FOR EACH YEAR FROM 1868 TO 1890, INCLUSIVE.

The in-transit and transshipment transactions of 1890 were distributed as to countries and ports as follows:

Of the value of merchandise received from British North America, amounting to $16,002,384, $12,450,246 came from the Provinces of Quebec, Ontario, Manitoba, and the Northwest Territory, and $3,552,138 from other British Possessions. The receipts from Europe amounted to $26,370,676, of which $20,664,427 came from the United Kingdom, and $5,706,249 from other Europe. The receipts from the West Indies were valued at $10,464,177, of which those from Cuba amounted to $9,757,256. Merchandise valued at $1,054,050 was received from Asia and Oceanica.

Of the in-transit shipments from the United States, $27,335,678 were destined for British North America, of which $21,140,198 was shipped to the Provinces of Quebec, Ontario, Manitoba, and the Northwest Territory. The shipments to Europe amounted to $17,707,261, of which $10,656,465 were destined for the United Kingdom. The shipments to Mexico amounted to $4,944,149, and to the West Indies to $4,124,025.

The value of receipts of in-transit merchandise at leading ports of entry were as follows: At New York, $28,661,236; Portland, Me., $7,938,397; Boston, $4,750,611; New Orleans, $2,378,218; San Francisco, $1,163,557; Galveston, $741,571; and at Northern Border and Lake ports, $8,451,389.

a Received and shipped.

Of the entire value of our foreign commerce, including that of the in-transit trade, during the last fiscal year, amounting to $1,758,537,945, 6.56 per cent. was carried in cars and other land vehicles; 7.09 per cent. in American steam vessels; 5.38 per cent. in American sail vessels; 72.09 per cent. in foreign steam vessels; 8.48 per cent. in foreign sail vessels, and .40 per cent. in vessels of which the nationality and motive power were unknown.

Our foreign commerce, carried in home vessels, measured by its value, has declined from its highest point, 75 per cent. in 1856, to 12.49 per cent. during the last fiscal year, while 80.57 per cent. was carried in foreign vessels. Only 7.09 per cent. of our foreign trade was conducted in steamers bearing our national flag, while 72.09 per cent. of that trade, with all its profits from the employment of capital and labor, was conducted in alien steam vessels. The constant and rapid decline of our share of the transportation of the commodities exchanged between this and foreign countries will be seen by reference to Appendix No. 9.

TONNAGE ENTERED AND CLEARED IN THE FOREIGN TRADE OF THE UNITED STATES.

The proportion of American and foreign vessels entered in our foreign trade during the last four years has remained about the same, the foreign tonnage representing 78.8 per cent. in 1887; 78.1 per cent. in 1888; 76.7 per cent. in 1889, and 77.5 per cent. in 1890 of the total tonnage entered in that trade.

IMMIGRATION.

The total number of immigrants arrived in the United States from foreign countries other than British North America and Mexico, during the year ending June 30, 1890, was 455,302, against 444,427 during the preceding fiscal year, being an increase of 10,875.

The following table shows the number and nationalities of immigrants arrived in the United States during the last fiscal year as compared with the fiscal year 1889:

The increase in immigration was mainly in arrivals from Austria-Hungary and Italy.

Tables Nos. 11, 12, and 13 of the Appendix exhibit the immigration into the country for a series of years.

DEFECTS IN THE STATISTICAL LAWS FOR THE COLLECTION OF DOMESTIC EXPORTS.

I repeat the recommendations which I made in regard to this important subject in my last annual report.

I earnestly invite your attention to the defects in the present law providing for the collection of statistics of domestic exports. The law under which these statistics are collected was passed in 1821, when our foreign commerce in merchandise amounted to only $109,000,000, and prior to the introduction of steam or motive power, when our frontiers were practically impassable by land, except at a few points, for the interchange of commodities with border nations.

The provision of this law requiring exporters to furnish information to the Government in regard to exports in vessels for statistical purposes reads as follows:

"Act February 10, 1820 (Rev. Stats., Sec. 337. * * * Fifth). Before a clearance shall be granted for any vessel bound to a foreign place, the collector shall require the owners, shippers, or consignors of the cargo to deliver to the collector manifests of the cargo, or of the parts thereof shipped by them, respectively, which manifests shall specify the kinds and quantities of the articles shipped by them, respectively, and the value of the total quantity of each kind of articles; and state that such manifest contains a full, just, and true account of all articles laden on board of such vessel by the owners, shippers, or consignors, respectively, and that the values of such articles are truly stated, according to their actual cost, or the values which they truly bear at the port and time of exportation. And the collector shall also require the master of the vessel and the owners, shippers, and consignors of the cargo, to state in writing, to the collector, the foreign place or country in which such cargo is truly intended to be landed. The manifests and statements hereby required shall be verified by the oath of the person by whom they are respectively made and subscribed."

This provision of the law has remained upon the statute books substantially as it was passed in 1820, and, as it provides for the collection of statistics of exports in water-borne vessels only, furnishes no means by which collectors or other officers of the Government charged with the duty of collecting such statistics can secure information in regard to exports of commodities from the country by railways and other land vehicles. Statistics of exports by railways, therefore, are procured

through the courtesy of the officers of a few companies only, and those are necessarily imperfect, as only the incomplete details furnished for the bills of lading can be given.

Full and accurate statistics of our trade with Canada and with Mexico are especially important, as our trade relations with these countries are frequently the subject of treaty negotiations and legislation.

With few or no exceptions all the countries of Europe have laws for the collection of exports by land vehicles, and Canada and Mexico collect and publish statistics of their exports to this country over railways.

It does not appear that it would impose a greater hardship upon persons exporting goods to a foreign country over railways to furnish information in regard to the kinds, quantities, and values thereof than is now imposed upon them when exporting goods in vessels. It is believed that, after a brief experience with a law which will remedy the defects in export statistics indicated, it would be found to involve little hardship and would prove no obstruction to our commerce.

A bill providing for the collection of such statistics over railways across our border has been presented to the last three Congresses and has once been favorably acted upon by the Committee on Commerce of the House of Representatives.

Experience has clearly demonstrated the necessity for some legislation on these subjects, and I therefore earnestly renew the recommendations above. The bill above referred to, draughted and submitted to the Forty-ninth, Fiftieth, and Fifty-first Congresses, will, it is believed, supply the necessary means of collecting these important statistics.

FORCE OF THE BUREAU OF STATISTICS AND ORGANIZATION.

The organization of this Bureau and the force thereof are as follows:

	Males.	Females.	Total.
Chief of Bureau	1	.....	1
Chief clerk	1	.....	1
Statistical expert	1	.....	1
Division of examination and revision	4	2	6
Division of compilation	12	5	17
Miscellaneous division	1	1	2
Library and files	.....	1	1
Stenographer and type-writer to Chief of Bureau	.....	1	1
Stenographer and clerk with chief clerk	1	.....	1
Total clerical force	19	10	29
Laborers and messengers	3	1	4
Total employés	22	11	33

The present force of this Bureau is not sufficient to perform satisfactorily the duties imposed upon it, and the clerks available for elaborate statistical work are frequently overtaxed. While the general duties of the Bureau, by earnest effort, are performed with reasonable promptness, it is very desirable that the usefulness of the Bureau may be increased by enlarging the scope of the work performed in the investigation and publication of statistics upon special subjects. The public interest in statistics is becoming more widespread and general, and the demands upon the Bureau for information, which are constantly increasing, are

not confined by any means to the regular statements and reports issued by the Bureau, but are greatly increasing for special statements in regard to the numerous articles of merchandise and products imported into and exported from our own and other countries. These inquiries are not only much more frequent, but relate to nearly all the industries of our country, covering a much larger field of investigation than heretofore, and tax to the utmost the ability and resources of the Bureau. These statements are sought for not only by Senators and Representatives and other Government officers, but also by numerous industrial associations, schools, colleges, scientific bodies, many leading economic journals, and thousands of individuals who are becoming interested in these subjects. That these commercial and economic statistics must be more elaborate and complete than heretofore is the result of the rapid growth and wonderful progress of our country in production, commerce, and intelligence.

I have recommended in my estimates for clerical service for the next fiscal year, an increase in the force and the appropriation for salaries in this Bureau, which will place the clerks charged with responsible duties on an equal footing with those performing similar duties in other bureaus of this Department, and more nearly commensurate with the peculiar ability and fitness required for statistical work. In order to keep pace with the greatly increased demands made by the various Departments of the Government and by the public on this office, it is absolutely necessary for the Bureau to have an increase in efficient force.

Respectfully yours,

S. G. BROCK,
Chief of Bureau.

Hon. WM. WINDOM,
Secretary of the Treasury.

No. 41.—*Statement showing the Number of Cabin and Other* **PASSENGERS DEPARTED** *from the Sea Ports of the United States for Foreign Countries, other than the British North American Possessions, and the Lines of Vessels employed and the* **COUNTRIES** *of* **DESTINATION** *during the* **Year** *ending June* 30, **1890.**

[In the absence of law requiring masters of vessels departing from the United States for foreign countries to deliver to collectors of customs manifests of the passengers embarking on such vessels, it is necessary to rely upon the courtesy of the agents of steamship and packet lines for information in regard to the outward passenger movement. The following statistics (Statement No. 41) relate only to the departures from the sea ports indicated in the table, and comprise only the data secured in the manner above indicated, but it is probable that the departures given embrace nearly the entire passenger movement from the United States to foreign countries from our sea ports.]
